Footnotes

[1] Ink droplets can be placed with a minimum pitch of 1/4800 inch
[2] A4 document print speed on plain paper is measured based on average of ESAT in Office Category Test of ISO/IEC 24734 standard.
[3] Photo print speed is based on default driver setting using ISO/JIS-SCID N2 standard on Canon Photo Paper Plus Glossy II and does not take into account data processing time on host computer.
[4] Page Yield of ink bottle used for initial setup is lower than the replacement, as a certain amount of ink is consumed to fill into the print head during the setup. Page yield is the estimated value based on Canon individual test method using ISO/IEC 24712 chart and continuous printing simulation with the replacement ink bottles after initial setup. Page yield of colour inks is an average yield of cyan, magenta and yellow inks combined. Black and colour page yields are not to be combined. Page yield varies significantly depending on contents printed and other factors.
[5] Full HD Movie Print is available for MOV and MP4 movie files created by select Canon digital cameras and camcorders. Requires installation of software bundled with Canon video or digital camera, from which the movie was captured. MOV files require: ZoomBrowser EX / ImageBrowser (version 6.5 or later), MP4 files require: ImageBrowser EX (version 1.0 or later).
[6] Easy-WebPrint EX requires Internet Explorer 8 or later
[7] When printing ISO/JIS-SCID N2 pattern on 10 cm x15 cm Photo Paper Plus Glossy II using default settings.
[8] When copying ISO/JIS-SCID N2 (printed by inkjet printer) on A4 size plain paper using default settings.
