SUREFIRE

THE BORA COOLING SYSTEM

You will not only improve your comfort while gaming, you will also maximize the lifespan of your laptop.

COOLING WITH SPEED

The fan speeds can be set to your preference; from turning them off completely, to increasing the cooling speed via the scroll reels up to 1200RPM. Even at their fastest, the fans only reach a maximum of 26dBA, which can barely be heard.

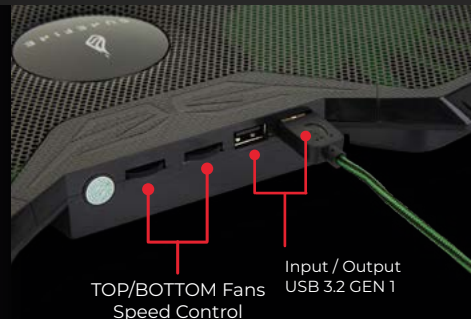

COOLING IN COMFORT

To optimise comfort, the cooling pad can be set to two different viewing angles, and the non-slip base ensures a stable platform for those critical gaming moments. Two hinged stoppers at the front prevent the laptop from sliding forward.

CONNECTED

The SureFire Bora also has a very useful additional USB port which can be used to attach an external device such as a keyboard, mouse or other gaming accessory. It also has a convenient storage compartment for the cable on the underside to keep it tidy when not in use.
